

How Cristo Rey operates the #1 work-study program with doowii

Corporate Work Study is the engine behind the Cristo Rey model.

Schools within the Cristo Rey Network partner with companies that sponsor student work placements. Students gain professional experience, employers support the school community, and administrators need a clear way to track the health of the entire program.

Doowii turns complex work-study data into clear, searchable answers so teams can make faster decisions and strengthen every part of the network.

How Doowii optimizes each aspect of Corporate Work Study:

Students

Track placements, timecards, work history, and supervisor comments to surface low performance for intervention.

Employer Partners

Analyze accounts, contacts, industries, and partner activity to strengthen relationships and coverage.

Schools

Compare schools across the network, identify trends, gaps, and opportunities in every area of the program.

With Doowii, teams can answer questions like:

How do timecard ratings compare year by year?

What students have 3 or more low ratings?

How do partner performance differ by industry?

Which school has the best partner retention rate?

Which partners are missing contact data?

Summary

There are 17,564 timecards for the Cleveland school that have received a rating of either 4 or 5. These records represent work study attendance across various partner organizations, with the majority of entries marked as "Above Expectations."

	Attendance	Student Name C	Partner C	Rating Number
2026-06-19	Abbie Adams	Apex Analytics	5	
2026-06-09	Bobby Baker	BlueBridge Brands	4	
2026-06-08	Chris Carter	Crescent Consulting	4	
2026-06-07	Danielle Diaz	Driftwood Dynamics	4	
2026-06-05	Evelyn Evans	Evergreen Enterprises	4	
2026-06-04	Fred Foster	Frontier Financial	4	
2026-06-03	Garrett Gomez	Granite Group	5	
2026-06-03	Henrietta Howard	Harbor Horizons	4

Example Questions

- What is the distribution of student employments by industry for 2025-26?
- Which schools have the most active partners?
- What students have the highest timecard ratings this month?

Analyze activity and trends through charts and tables to reveal patterns across partners, pipelines, and more

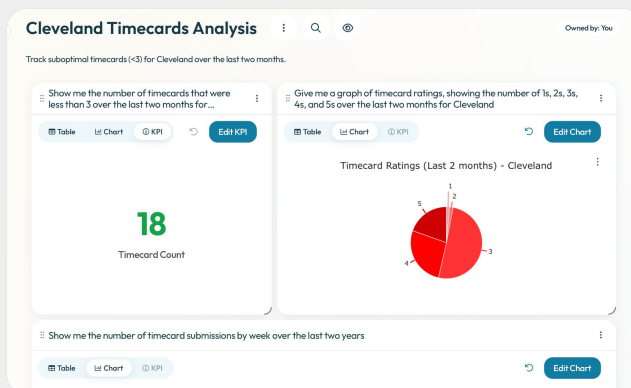

What Teams Can Track

- Student employment trends over time by industry, sector, and more
- Filtered timecard ratings and evaluations
- Surface employment data for manual evaluation based on custom criteria

Customize and share pinboards to turn high value answers into visible metrics across teams

Reusable Reporting Examples

- School-level performance tracking to surface low timecard ratings and at-risk students
- Network-wide employer partner dashboard
- Student-specific reports for quick filtering

From one off reporting to reusable reporting.

Save high-value answers in pinboards so school teams can monitor key metrics, spot trends, and take action faster.

The doowii impact

In just the first 2 months after rollout, Cristo Rey has seen real results

Doowii by the numbers (First 2 months)

86%

Success Rate

Based on user session success

What people are asking about

Student performance (35%)

Example: Show supervisor comments for students who received low work-study ratings this week.

Reporting requests (23%)

Example: Create a line chart showing timecard ratings for [student] over the last two years.

Student placements & work history (21%)

Example: Which class of 2027 students are most interested in healthcare jobs?

Account intelligence (14%)

Example: List and sort accounts that have affiliated contacts or supervisor emails on file by industry.

Pipeline & opportunity planning (7%)

Example: How many paid and funded FTEs are available by school?

Time saved and impact delivered.

Doowii is reducing the amount of time teams spend pulling reports, cleaning data, and answering repeat questions so they can focus on students, partners, and program success.

What users are saying

From an operations standpoint, having a centralized and consistent platform like this is incredibly valuable. **—CWS School Leader**

Opportunities with doowii

How Cristo Rey can expand impact with Corporate Work Study and beyond

Growing within Corporate Work Study

Standardize Core CWS Reporting

Make Doowii the shared reporting layer for every CWS team

Key Outcomes

- Consistent definitions for core CWS metrics across schools
- Shared pinboards for placements, pipeline, and timecards
- Less time spent rebuilding the same reports manually
- Easy network-wide comparison without spreadsheet cleanup
- Simplified onboarding for new CWS staff

Create Consistent Flagging Rules

Surface needs for intervention earlier using defined KPI boundaries

Key Outcomes

- Automatic signaling and visibility into students, partners, and records needing attention
- Earlier intervention before issues become urgent
- More consistent support pipelines across campuses
- Better tracking of recurring risks over time

Expanding beyond Corporate Work Study

Doowii has pre-existing connections to easily incorporate academic data, which could give Cristo Rey teams a more complete view of each student's journey while also opening new academic use cases.

Connect Student Educational Data

Combine workplace and academic data to allow for holistic views

Key Outcomes

- Holistic views across work-study, academics, and attendance to create better flags and profiles for CWS support teams
- Better context to assign work studies based on academic proficiency and college/career goals
- Less manual cross-checking across disconnected systems

Integrate Doowii's Teacher Hub

Give teachers access to Doowii tools specialized for their classes

Key Outcomes

- Ready-to-use dashboards tailored to each teacher's classes
- Easier tracking of assignments, engagement, and performance
- Faster identification of students who need classroom support
- Consistent visibility for teachers without custom reporting work
- Improved ability to prepare class materials based on insights
